

Arto Salomaa

A Pioneer of Science
from
Turku

Arto

Turku Cathedral

Arto & Turku

- Born in Turku, 1934

Arto & Turku

- Born in Turku, 1934
- Proud of his native Turku, in particular of native “Turku language”

Arto & Turku

- Born in Turku, 1934
- Proud of his native Turku, in particular of native “Turku language”
- Never left Turku permanently

Arto & Turku

- Born in Turku, 1934
- Proud of his native Turku, in particular of native “Turku language”
- Never left Turku permanently
- Proud of Finnish Sauna, in particular of his Salosauna

Arto & Turku

- Born in Turku, 1934
- Proud of his native Turku, in particular of native “Turku language”
- Never left Turku permanently
- Proud of Finnish Sauna, in particular of his Salosauna
- Jealous of those who have never seen “lousy white stuff”

Roots in Turku

Arto and his father J.E. Salomaa, a professor in Philosophy at Turku University

Arto Salomaa 80

Arto Salomaa 80

Monday

9.00 - 9.30	Opening ceremony
9.30 - 10.00	The Internet is great but also dangerous H. Maurer
10.00 - 10.30	Are you smarter than a cucumber? or How to measure and visualize species' relatedness L. Kari
10.30 - 11.00	Coffee break
11.00 - 11.30	Thue systems: an interplay between mathematics and computer science Yu. Matiyasevich
11.30 - 12.00	Understanding quantum randomness C. Calude
12.00 - 14.00	Lunch
14.00 - 14.30	Arto at Western, a friendly giant A. Szilard
14.30 - 15.00	Regularity since 1982 T. Harju
15.00 - 15.30	Coffee break
15.30 - 16.00	The complex state of state complexity J. Brzozowski
16.00 - 16.30	On some coloring problems for infinite words A. de Luca
16.30 - 17.00	Universal pattern generation by cellular automata J. Kari
19.00 -	Dinner

Tuesday

9.00 - 9.30	Arto Salomaa - pioneer of computer science education J. Hromkovic
9.30 - 10.00	Return words and derived words D. Perrin
10.00 - 10.30	Coffee break
10.30 - 11.00	A new acceptance modus for weighted finite automata W. Kuich
11.00 - 11.30	Matrices and recursively enumerable sets J. Honkala
11.30 - 13.30	Lunch
13.30 - 14.00	Arto Salomaa, the Bourbaki of formal languages S. Marcus
14.00 - 14.30	Networks of Watson-Crick DOL systems: new developments E. Csuhaj-Varjú
14.30 - 15.00	Coffee break
15.00 - 15.30	Descriptive complexity of input-driven pushdown automata K. Salomaa
15.30 - 16.00	My ways to Artolândia G. Paun

Old friends

Portrait of Arto

- Prepared by the University of Arts in the occasion of Arto's 60 year birthday
- One of the first computer-aided portraits in Finland

Contents

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN

Career

- Post graduate studies at Berkeley
 - J. Myhill
 - A. Tarski
- C. Shannon and J. McCarthy, Automata Studies

Career

- Ph.D. in Turku 1960
 - many valued logic!
- First paper in Automata Theory, 1964
 - “Theorems on the representation of events in Moore automata”,
Annales Universitatis Turkuensis, Ser. A I, 69 (1964), 14 pp.
- Professor at Oulu University 1965
- Professor at Turku University 1966–1998

Career

Visiting professorships:

- Univ. of Western Ontario, London, 1966–1968
- Univ. of Aarhus, 1973–1975
- Univ. of Waterloo, 1981–1982
- Short term visits in more than 150 universities

Career

Each of the visits had a characteristic influence:

- London became the second home of Arto; the first book was written
- Theory of L-systems was created in Aarhus
- Sheng Yu was met in Waterloo

Career

- Academy professor in Finland
 - Arto was appointed three times for five year periods in 1975–1999
- Member of Finnish Academy of Sciences, 1970
- Member of Academia Europaea, 1992
- Academician, 2001
 - One of the altogether 12 science academicians in Finland

Career

May 1971

Arto and Grzegorz Rozenberg met!

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN

Scientist

First of all Arto is a

SCIENTIST

Arto has written

- more than 400 scientific articles
- 13 different books
- around 40 collected books

and most amazingly, ...

Scientist

- more than 100 scientific articles after his retirement!

Scientist

His research interests cover

- many-valued logic
- automata theory
- formal language theory
- combinatorics on words
- cryptography
- bioinspired computing

A few instances of Arto's publications

His first papers were on

- many-valued logic
 - created connections to Moscow school of logic in 1960's (Jablonski)
 - turned out important to Cerny's conjecture after 50 years!

A few influential papers

- “Two complete axiom systems for the algebra of regular events”,
Journal of the Association for Computing Machinery, 13 (1966)
158–169
 - was rediscovered 30 years later

Importance of morphisms of free monoids:

- “Equality sets for homomorphisms of free monoids”,
Acta Cybernetica, 4 (1978), 127–139
- (with K. Culik and F.E. Fich)
“A homomorphic characterization of regular languages”,
Discrete Applied Mathematics, 4 (1982) 149–152

Connections of Skolem’s Problem and morphic sequences

Initiator of research topics

- Axiomatization of regular events
- L-systems
- Formal power series in automata theory
- Morphic problems
 - (with K. Culik)
“On the decidability of homomorphism equivalence for languages”
Journal of Computer and System Sciences, 17 (1978) 163–175
 - (with K. Culik)
“Test sets and checking words for homomorphism equivalence”
Journal of Computer and System Sciences, 20 (1980) 379–395
- Public-key cryptography

A team worker

- MSW-team (Maurer–Salomaa–Wood)
 - one of the most productive groups in TCS; influenced, e.g., to E. Welzl

A team worker

- MSW-team (Maurer–Salomaa–Wood)
 - one of the most productive groups in TCS; influenced, e.g., to E. Welzl
- Romanian collaboration
 - started with A. Mateescu and L. Kari
 - G. Paun, C. Calude, L. Ilie, S. Marcus, I. Petre

A team worker

- MSW-team (Maurer–Salomaa–Wood)
 - one of the most productive groups in TCS; influenced, e.g., to E. Welzl
- Romanian collaboration
 - started with A. Mateescu and L. Kari
 - G. Paun, C. Calude, L. Ilie, S. Marcus, I. Petre
- With Sheng Yu

A team worker

- MSW-team (Maurer–Salomaa–Wood)
 - one of the most productive groups in TCS; influenced, e.g., to E. Welzl
- Romanian collaboration
 - started with A. Mateescu and L. Kari
 - G. Paun, C. Calude, L. Ilie, S. Marcus, I. Petre
- With Sheng Yu
- And, of course, with G. Rozenberg

Internationality

- The most characteristic feature of Arto's research
- Arto was among the first international researchers in Finland, in fact even before the term was “discovered” in Finland
- None of his books has been published in Finnish!

Recognition

- Doctor Honoris Causa, 9 times:
Åbo, Oulu, Szeged, Bucharest, Magdeburg, Riga, Iasi, Graz and London

Recognition

- Doctor Honoris Causa, 9 times:
Åbo, Oulu, Szeged, Bucharest, Magdeburg, Riga, Iasi, Graz and London
- One of the first 12 Centres of Excellence in Finland, 1993

Recognition

- Doctor Honoris Causa, 9 times:
Åbo, Oulu, Szeged, Bucharest, Magdeburg, Riga, Iasi, Graz and London
- One of the first 12 Centres of Excellence in Finland, 1993
- Special international birthday issues:
LNCS, Fundamenta Informatica, Information and Computation,
Theoret. Comput. Sci., LNCS, LNCS, Theoret. Comput. Sci.

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR**
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN

Educator

Via his books Arto has had an enormous influence on education of several generations of TCS

Educator

Via his books Arto has had an enormous influence on education of several generations of TCS

Arto has published

- 12 books in 8 different languages,

Educator

Via his books Arto has had an enormous influence on education of several generations of TCS

Arto has published

- 12 books in 8 different languages, however, none in Finnish or Swedish, so far!

Educator

- Pioneering
- Very well written
- Thematically broad

A few characteristic features

- Theory of Automata, 1969

- the first book
- very original even today
- mishandled by the publisher

A few characteristic features

- Formal languages, 1973

A few characteristic features

- Formal languages, 1973

- a classical masterpiece
- “among the 100 most cited math-books”
- created avenues of formal language research for several decades
- made Arto the “Father of Formal Languages”

Pioneering ones

- Automata-Theoretic Aspects of Formal Power Series, 1978

- a masterpiece of new aspects and tools in automata theory
- involved Matti Soittola – a hidden data bank

Pioneering ones

- The Mathematical Theory of L Systems, 1980
 - timely presentation of an active research topic
- Public-Key Cryptography, 1990
 - a new opening to a fascinated field
- DNA Computing. New Computing Paradigms, 1998
 - another challenging topic

Jewels

- Jewels of Formal Language Theory, 1986
 - a jewel, motivated by “Three Pearls of Number Theory” by Khinchin
 - attractive announcement of the beauty of morphic problems
- Cornerstones of Undecidability, 1994
 - undecidability through PCP and Hilbert’s 10th Problem
 - continues the praise of morphic problems

Last Symphony

- Handbook of Formal Languages, 1997

Last Symphony

- Handbook of Formal Languages, 1997

- three volumes, 2000 pages

Last Symphony

- Handbook of Formal Languages, 1997

- three volumes, 2000 pages
- 51 authors

Last Symphony

- Handbook of Formal Languages, 1997

- three volumes, 2000 pages
- 51 authors
- finalized in three and half years

Last Symphony

- Handbook of Formal Languages, 1997

- three volumes, 2000 pages
- 51 authors
- finalized in three and half years
- MASTERPIECE COLLECTING RESEARCH ACHIEVEMENTS OF 30 YEARS!

Educator

In 80 year symposium:

A golden medal of ETHZ for computer science education

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR**
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN

Supervisor

- Gentle
- Supportive
- Professional

Arto has supervised 24 Ph.D.'s

- in London, Turku and Aarhus
- in the areas of
 - Automata Theory
 - Formal Languages
 - Cryptography
 - Combinatorics on Words

Supervisor

The first ones:

- N. Jones, 1967, London
- P. Turakainen, 1968, Turku

The last ones:

- V. Mihalache, 1998, Turku
- L. Ilie, 1998, Turku

And the total list:

- N. Jones, P. Turakainen, M. Steinby, T. Urponen, A. Szilard, M. Penttonen, S. Skyum, M. Linna, M. Soittola, K. Ruohonen, M. Nielsen, J. Karhumäki, R. Leipälä, T. Harju, J. Honkala, V. Niemi, J. Kari, L. Kari, J. Koskinen, A. Renvall, M. Lipponen, C. Ding, V. Mihalache, L. Ilie

Supervisor

The quality:

- More than two out of three are or have been professors in Canada, Finland, Denmark or Hong Kong

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE**
- 6 A FAMILY MAN

Promotor

Arto was never an administrator

- He was once asked to become the president of the Academy of Finland, and then he thought this for a short while ...
...but told later one of the best decisions he has made was to refuse the position

Promotor

Arto was never an administrator

- He was once asked to become the president of the Academy of Finland, and then he thought this for a short while ...
... but told later one of the best decisions he has made was to refuse the position

Instead he was

- a promotor of science in many ways
- an initiator of important developments

Promotor

Arto has

- served in PC's of more than 50 international conferences in TCS; 15 times for ICALP
- been in editorial boards of more than 10 top journals of TCS
- served in a number of evaluation panels of CS for different countries

Promotor

Arto has initiated

- DLT in 1993
- Gödel Prize in 1993
- Nevanlinna Prize in 1982

Promotor

Services to EATCS:

- board member, 1993
- president, 1979
- monograph series editor, 1983

Promotor

Services to EATCS:

- board member, 1993
- president, 1979
- monograph series editor, 1983

He received

- EATCS award, 2004

- 1 CAREER
- 2 SCIENTIST
- 3 EDUCATOR
- 4 Ph.D. SUPERVISOR
- 5 PROMOTOR OF SCIENCE
- 6 A FAMILY MAN**

The family is extremely important for Arto

Kaarina has followed Arto everywhere for more than 50 years

Earlier:

The family is extremely important for Arto

Kaarina has followed Arto everywhere for more than 50 years

Earlier:

Later:

Kai is continuing Arto's avenue as professor in Queens University

Kirsti is Arto's health advisor

Grandchildren Suvi, Juhani and Daniel are very special to Arto

Arto's triangle bus trips: Turku–Kauhajoki–Rauhala–Turku are wildly known and admired

And last but not least

SALOSAUNA

is an essential part of Arto!

In summer:

And last but not least
SALOSAUNA

is an essential part of Arto!

In summer:

In winter:

THANKS

- to Arto for many pieces of information
- to Kai for pictures
- to A. Saarela for making the presentation
